Работният език е английски – работи се с екип от целия свят.
Офисите на дружеството са в град София и в град Пловдив.**

1. PHP Developer

Responsibilities

- Driving the software development of our platform with innovative high quality code
- Writing code that is maintainable, testable and clean, building applications and services that will scale effectively and communicate through API.

Requirements

- Deep knowledge in PHP programming.
- Excellent understanding of MVC.
- Very good experience in JavaScript OOP and AJAX.
- Exhaustive knowledge of database design and implementation.
- Good experience in HTML, CSS and native JS.

NICE TO HAVE

- Experience In web application security.
- Experience in fine performance tune up.
- Experience in Memcached, Backbone JS, Less, Node JS.

2. Scrum Master

Responsibilities:

- Organize and facilitate daily stand-ups, sprint refinements and plannings, reviews and retrospectives.
- Coach the development teams to practice agile principles of collaboration, visibility, prioritization and self-organization
- Establish workflows and processes by recommending improvements and changes to best practice.
- Encourage communication and effective collaboration, facilitate discussions and conflict resolution
- Be the point of contact for external communications (e.g. management, stakeholders)
- Work closely with Product Owners and Team Leads to have good understanding of the product priorities and goals, handle backlog and new requests
- Create dashboards and reports with productivity metrics and useful KPIs
- Identify and remove obstacles and distractions that might prevent the team from meeting the sprint goal

OUR EXPECTATIONS:

- Previous experience as a Scrum Master, project management or related experience in a Scrum team is an advantage
- Excellent understanding of Agile and Scrum
- Good familiarity with SDLC
- Organizational skills
- Exceptional communication and team collaboration skills
- Ability to multitask, prioritize and synchronize
- Excellent talking and writing English
- Ability to work with Jira and Confluence

GREAT ADVANTAGES:

- Scrum Master certification
- Technical background

3. JAVA Tech Lead

Responsibilities:

- Working closely with business teams to define plans and solutions to provide a stable, agile, and user-friendly platform
- Ensure highest standards of Team's performance are reachable
- Develop high-quality software, design, and functional documentation
- Provide estimates for specific software feature implementation
- Identify, prioritize, and execute tasks in the software development life cycle
- Build unit tests for your code
- Perform code reviews
- Develop and maintain tools and applications by producing clean, efficient code that follows open sourcing standards
- Ensure software is up to date with latest technologies and standards
- Prepare architectural diagram and technical requirements

OUR EXPECTATIONS:

- Good communication skills - both verbal and written
- Analytical mindset and good problem-solving skills
- Experience working in multicultural environment
- Able to work independently with defined problems on a middle-senior level in certain areas of technical or business expertise
- Upper-Intermediate (and above) English
- Result-oriented mindset
- Proactive

4. Data Base Analyst

Responsibilities

- Build database systems of high availability and quality depending on each end user's specialized role;
- Design and implement database in accordance to end users information needs and views;
- Define users and enable data distribution to the right user, in appropriate format and in a timely manner;
- Use high-speed transaction recovery techniques and backup data;
- Minimize database downtime and manage parameters to provide fast query responses;
- Provide proactive and reactive data management support and training to users;
- Determine, enforce and document database policies, procedures and standards;
- Perform tests and evaluations regularly to ensure data security, privacy and integrity;
- Monitor database performance, implement changes and apply new patches and versions when required.

Requirements

- Proven working experience as a Database administrator;
- Hands-on experience with database standards and end user applications;
- Excellent knowledge of data backup, recovery, security, integrity, SQL and NoSQL engines;
- Familiarity with database design, documentation and coding;
- Previous experience with DBA case tools (frontend/backend) and third party tools;
- Familiarity with programming languages;
- Problem solving skills and ability to think algorithmically;
- BS degree in a computer discipline or relevant certification.

Advantages

- Knowledge with MySQL, PostgreSQL
- Familiar with cloud technologies such as GCP, AWS

5. Senior DevOps

YOUR ROLE:

- Design and implement CI/CD processes for custom developed applications in the public cloud
- Automate infrastructure provisioning and maintenance in public cloud
- Build, deploy and maintain distributed applications with auto scale policies over Kubernetes orchestration platform

Responsibilities:

- Maintain centralized configuration management of operating systems and deployed applications
- Maintain centralized logging and metric monitoring solution

OUR EXPECTATIONS:

- Knowledge in Docker, Kubernetes
- Knowledge in CI/CD processes and tools like Git, Jenkins, Microsoft Teams
- Knowledge in Terraform, Packer, Ansible
- Experience with Google Cloud
- Good understanding of Linux/UNIX operating systems and networking concepts
- Experience and knowledge in Python, Bash
- Knowledge in Change Management and Release Management processes
- Excellent troubleshooting skills

- Positive attitude and commitment to professional development
- Good communication and collaboration skills
- Good command of written and spoken English

GREAT ADVANTAGES:

- Experience with administration of Nginx, MySQL
- Knowledge of PHP technologies and frameworks
- Good understanding of monitoring solutions
- Understanding of high availability and disaster recovery systems
- Experience with IT system security, reliability, performance, scalability

6. JAVA Developer

YOUR ROLE:

- You will be part of a talented software team that works on mission-critical applications;
- Java developer roles and responsibilities include managing Java application development while providing expertise in the full software development lifecycle, from concept and design to testing;
- Designing, developing and delivering high-volume, low-latency applications for mission-critical systems.

Responsibilities:

- Contribute in all phases of the development lifecycle;
- Write well designed, testable, efficient code;
- Ensure designs are in compliance with specifications;
- Prepare and produce releases of software components;
- Support continuous improvement by investigating alternatives and technologies and presenting these for architectural review.

OUR EXPECTATIONS:

- Object Oriented analysis and design using common design patterns;
- Profound insight of Java (Classloading, Memory Management, Transaction management etc.);
- Excellent knowledge of Relational Databases, SQL and ORM technologies (JPA2, Hibernate);
- Excellent knowledge on NoSQL Databases;
- Experience in the Spring Framework – Boot/Integration/Data;
- Experience with Docker and deployed JVM based containers on K8S;
- Working with proper tools to monitor runtime environment with logs/metrics/traces – preference to ELK stack;
- Experience with streaming, specifically Apache Kafka.
- Good command of English (B2)

GREAT ADVANTAGES:

- Performance testing and improvements, JMeter/Gatling;
- Experience in developing web applications using at least one popular web framework (JSF, Wicket, GWT, Spring MVC);
- Experience with test-driven development.

Ето тук показваме и какво предлагаме на бъдещите ни служители:

With us you will be rewarded with:

- Be part of a fast-growing company and participate in the business expansion plans
- Friendly environment with colleagues ready to share their experience
- Challenging and interesting projects
- Workflow helping you to teach new things all the time
- Opportunity to turn your ideas and approach into real implementation
- Full-time employment and labor contract
- Additional health insurance lux package from very first day
- Food vouchers
- Transport amounts
- Birthday vouchers
- Fruits, drinks, cakes, pizza and other goodies
- Regular Happy hours & Teambuilding events
